

K2 PASSWORD DISPENSER **By MYTEK**

ECOLOGICAL AND ROBUST

COMFORTABLE AND PRACTICAL

The K2 Ticket dispenser was designed to solve a common practice, the management of waiting/attendance queues.

Created exclusively for interior spaces, its final appearance can be customized to your wishes.

THE TECHNOLOGY

The K2 was created to allow the use of a 10 inch touchscreen. It is supplied with an 80mm wide printer inside. If you have a receipt printer at the counter, use the same roll of paper. The solution's small server is mounted in the kiosk to power the printer and screen.

It can work via WiFi or network cable, depending on its structure and the location of the kiosk.

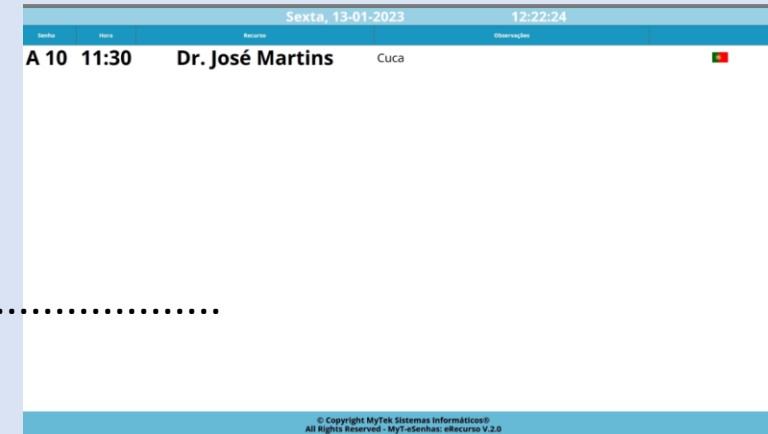

THE SOFTWARE

eKiosk
Issuance of
Service Tickets

eCliente
Call of Passwords;
Entertainment Videos;
Bar with local weather;
RSS from RTP and Antena 1.
